EDUCATION

University of Minnesota Crookston
Bachelor of Science in Software Engineering

Crookston, Minnesota
Expected Spring 2028

TECHNICAL SKILLS

Coursework and project languages: C, C++, Java, Python, JavaScript, Monkey C, HTML, CSS

Frameworks and tools: React, Next.js, Node.js, Sharp, Cloudflare Workers, D1, GitHub Actions, Connect IQ

PROJECTS

Movie Master

July 2026 - Present

Sole Developer | moviemaster.vip

- Developed and maintain a storefront that has handled dozens of paid orders for a movie recommendation business.
- Built a browser game with controller support and public leaderboards; added a Cloudflare Worker and D1 backend for visitor analytics and game records.
- Work with the owner to clarify requests, suggest alternatives, and keep the purchase flow and site usable.

Bugnut

2026

Comic Reader and Publishing Tools | bugnut.art

- Built a Next.js comic reader and publishing pipeline for 14 works and 94 pages, with responsive spreads, keyboard navigation, and shareable page links.
- Automated image resizing, renaming, thumbnails, and catalog generation using Node.js and Sharp; added content validation and automated deployment.

Typeface 955 Garmin Watch Face

2026

Monkey C | *Garmin Connect IQ*

- Developed a configurable watch face with cached time and date formatting and event-driven battery updates.
- Fixed a blank-screen bug found on the physical watch by redrawing each frame while reusing cached values.

EXPERIENCE

TELUS Digital

Remote

Quality Analyst

January 2024 - Present

- Evaluate search results, webpages, advertisements, videos, and AI responses against detailed quality guidelines.
- Assess user intent to determine whether content and responses address the request.

Lifeboat Network

Eden Prairie, MN

Project Manager and Supervisor

May 2020 - July 2022

- Managed production of custom Minecraft maps and experiences for publication on the official Minecraft Marketplace.
- Coordinated schedules, supervised project work, and reviewed deliverables against Microsoft's publishing standards.

Isaac's Tech Services

Minnesota

Freelance Computer Technician

January 2014 - Present

- Build, diagnose, and repair computers across a range of budgets; have served hundreds of clients.
- Troubleshoot Windows and PC hardware problems and explain repair options to customers.
